

Invoice Automation Discovery Proposal

Invoice Automation Discovery shows 61% automation readiness with 81% AI confidence. The process appears to be a high-risk candidate with strong potential for RPA, OCR, and LLM support.

Automation Readiness	61%
AI Confidence	81%
Risk Level	High
Benchmark ROI	285%
Payback	7 months

Automation Opportunities

- Invoice intake, OCR extraction, ERP validation, approval routing, and payment posting - AI + RPA
- Receive invoice email - Workflow
- Download attachment - RPA
- Extract invoice data - AI
- Validate amount - Workflow
- Approve high value exceptions - Human Only
- Update ERP - RPA

Recommended Stack

- RPA
- OCR
- LLM
- Workflow
- Human Approval

KPIs

- Invoice Processing Time
- Payment Delay
- Accuracy
- DSO

Risks

- Operational risk from manual dependency
- Compliance risk if approvals are bypassed

- Security risk for document handling
- Model hallucination risk on ambiguous inputs
- Business continuity risk if systems are unavailable

Mitigations

- Human approval for high-value cases
- Audit logs and traceability
- Confidence thresholds for AI outputs
- Secure local file storage with access control
