

Employee Onboarding Automation Workflow

Project: Employee Onboarding Automation

Client: TechNova Solutions

Industry: Information Technology

Objective

Analyze the current onboarding process to identify manual activities, bottlenecks, and automation opportunities using workflow automation and AI-powered document verification.

Workflow

1. Candidate accepts offer.
2. HR creates employee record.
3. Employee uploads required documents (ID, address, education, tax forms, bank details).
4. AI verifies document completeness and authenticity.
5. HR reviews exceptions and approves.
6. IT provisions email, laptop, VPN, and application accounts.
7. Manager assigns team, role, and onboarding plan.
8. Employee is enrolled in mandatory training and compliance courses.
9. Employee signs policies electronically.
10. HR performs final compliance check.
11. Employee onboarding completed and dashboard updated.

Automation Opportunities

- Automated document collection and reminders.
- AI document validation.
- Automatic account provisioning.
- Digital approvals and notifications.
- Training enrollment automation.
- KPI dashboard for onboarding status.

Success Metrics

- Reduce onboarding time by 60%.
- 90% fewer manual follow-ups.
- 95% document accuracy.
- 100% compliance completion before Day 1.
